148 Acres with three bedroom home needing a bit of work.

148.3 Acres with four good dams, fully fenced and divided into three paddocks.

There is a three-bedroom dwelling on the property that just needs to be finished off.

The power is connected to the house and the septic has been installed but not connected to the house. There is a water tank soon to be connected.

All inspections have been done to this stage, it only requires a final when all work has been completed.

There is also a good size shed 9.6m x 10.6m with power and has it's own meter, it has also been stick raked and de-stumped about four years ago.

The school bus runs right past the front gate and there is a mail delivery service to the gate.

The property is about halfway between Gin Gin and Childers around 30 mins each way.

It's well worth an inspection.
